Regents Exam Questions G.C.A.2: Chords, Secants and Tangents 13 Name: $\qquad$ www.jmap.org

## G.C.A.2: Chords, Secants and Tangents 13

1 In the accompanying diagram, $\overline{P A}$ and $\overline{P B}$ are tangents drawn to circle $O$. If $\mathrm{m} \angle P B A=70$, find $\mathrm{m} \angle P$.

2 In the accompanying diagram, $\overline{A B}$ and $\overline{A C}$ are tangents to circle $O$, and chord $\overline{B C}$ is drawn. If $\mathrm{m} \angle A B C=72$, what is $\mathrm{m} \angle A$ ?

3 In the accompanying diagram of circle $O, \overrightarrow{X A}$ and $\overrightarrow{X B}$ are tangents and $\mathrm{m} \angle X A B=75$. Find $\mathrm{m} \angle X$.

4 From external point $A$, two tangents to circle $O$ are drawn. The points of tangency are $B$ and $C$. Chord $\overline{B C}$ is drawn to form $\triangle A B C$. If $\mathrm{m} \angle A B C=66$, what is $\mathrm{m} \angle A$ ?

1) 33
2) 48
3) 57
4) 66

Regents Exam Questions G.C.A.2: Chords, Secants and Tangents 13 Name: $\qquad$ www.jmap.org

5 The accompanying diagram represents circular pond $O$ with docks located at points $A$ and $B$. From a cabin located at $C$, two sightings are taken that determine an angle of $30^{\circ}$ for tangents $\overline{C A}$ and $\overline{C B}$..

What is $\mathrm{m} \angle C A B$ ?

1) 30
2) 60
3) 75
4) 150

6 In the accompanying diagram, $\overline{P Q}$ and $\overline{P S}$ are tangents drawn to circle $O$, and chord $\overline{O S}$ is drawn. If $\mathrm{m} \angle P=40$, what is $\mathrm{m} \angle P Q S$ ?

7 In the diagram below, $\overline{A C}$ and $\overline{B C}$ are tangent to circle $O$ at $A$ and $B$, respectively, from external point $C$.

If $\mathrm{m} \angle A C B=38$, what is $\mathrm{m} \angle A O B$ ?

1) 71
2) 104
3) 142
4) 161

8 Tangents $\overline{P A}$ and $\overline{P B}$ are drawn to circle $O$ from an external point, $P$, and radii $\overline{O A}$ and $\overline{O B}$ are drawn. If $\mathrm{m} \angle A P B=40$, what is the measure of $\angle A O B$ ?

1) $140^{\circ}$
2) $100^{\circ}$
3) $70^{\circ}$
4) $50^{\circ}$

## G.C.A.2: Chords, Secants and Tangents 13

5 ANS: 3
Because tangents $\overline{C A}$ and $\overline{C B}$ meet at a common point, the tangents are of equal length. $\triangle \mathrm{ABC}$ is an isosceles triangle with equal angles of $75^{\circ}$ at $A$ and $B . \frac{180-30}{2}=75$
