1. Which construction is represented by the diagram below?

[A] copying $\overline{AB}$   [B] bisecting $\overline{AB}$   [C] rotating $\overline{AB}$   [D] drawing a line parallel to $\overline{AB}$

2. Which figure best represents the construction of a line segment congruent to a given segment?

[A] none of these

[B] 

[C] 

[D] 

3. Which figure best represents the construction of a segment perpendicular to a given segment through a given point?

[A] 

[B] 

[C] 

[D] none of these
4. Which figure best represents the construction of a point one-third of the way between the endpoint and midpoint of a segment?

[A] 

[B] 

[C] none of these 

[D] 

5. Which figure best represents the construction of the perpendicular bisector of a segment?

[A] 

[B] none of these 

[C] 

[D]
[1] B____
[2] C____
[3] B____
[4] C____
