

A2.S.6: Regression: Determine from a scatter plot whether a linear, logarithmic, exponential, or power regression model is most appropriate

- 1 Samantha constructs the scatter plot below from a set of data.

Based on her scatter plot, which regression model would be most appropriate?

- | | |
|----------------|----------------|
| 1) exponential | 3) logarithmic |
| 2) linear | 4) power |

A2.S.6: Regression: Determine from a scatter plot whether a linear, logarithmic, exponential, or power regression model is most appropriate
