

NAME: _____

P.I. A.A.39: Determine whether a given point is on a line, given the equation of the line

1. State whether the following ordered pair of numbers is a solution of the equation. Explain your answer.
 $3x = y + 5$; $(-7, -1)$.

If x and y are replaced by the ordered pair $(-7, -1)$, the number sentence is not true; therefore, this
[1] ordered pair is not a solution.
