

NAME: _____

P.I. A2.A.73: Solve for an unknown side or angle, using the Law of Sines

1. Describe a situation in which you can use the Law of Sines to find a missing measure. Tell what information you need.

Answers may vary. Sample: If you know two angles of a triangle and the length of any one side, you can use the Law of Sines to find any other missing measure. Since you know two angles, you can find

[1] the third angle.
