

NAME: \_\_\_\_\_

*P.I. A2.A.73: Solve for an unknown side or angle, using the Law of Cosines*

1. Draw an oblique triangle with a missing side which can be found using either the Law of Cosines or the Law of Sines. Tell which law you would use to find the missing side.

Answers may vary. Sample: A drawing of a triangle with two sides given and the included angle.

[1] Student states that the Law of Cosines can be used.
