

P.I. A.G.4: Identify and graph linear, quadratic (parabolic), absolute value, and exponential functions

Graph:

1. $4x - 3y = -12$

[1] _____

2. $5x + 6y = 30$

[2] _____

3. Make a table and graph: $x + y = 4$

[3] _____

Graph:

4. $7x - 3y = -21$

[4] _____

5. $5x + 8y = 40$

[5] _____

6. Make a table and graph: $4x + y = 8$

[6] _____

7. Make a table and graph: $4x + y = 4$

[7] _____

10. Graph: $6x - 7y = -42$

[10] _____

8. Graph: $5x + 4y = 20$

[8] _____

11. Make a table and graph: $3x + y = 3$

[11] _____

9. Make a table and graph: $x + y = 6$

[9] _____

12. Make a table and graph: $2x + y = 4$

[12] _____

[1]

[5]

[2]

[6]

[3]

[7]

[4]

[8]

[9]

[10]

[11]

[12]
